

“Orbs Launching Orbs”

- Location: Western U.S.
- Time of Day: Dusk (on two separate days)

- Three teams of two federal law enforcement special agents each (USPER1 through USPER6) independently describe seeing orange “orbs” in the sky emit/launch smaller red “orbs” in groups of two to four, with three being the general consensus. This is stated to have occurred at least five times. Each time, the orange orb would appear, launch red orbs, then disappear. The orange orb was only visible for one or two seconds. The red orbs would generally move away from the orange “mother” orb in a horizontal path, but in a couple of instances, one red orb was stated to move “heading up at an angle,” while another witness stated sometimes the red orbs would “swoop down” after being launched from the larger orange orb. These events were witnessed by multiple teams from varying locations and vantage points over a two-day period. Due to the sequential nature of the events, it is not known whether there was a single orange “mother” orb that released the groups of red orbs or whether there were multiple orange orbs at play.

「發射球體的球體」

- 地點：美國西部
- 時間：黃昏（分別在兩天）

- 三組各由兩名聯邦執法特別探員組成的隊伍（USPER1 至 USPER6）獨立地描述看見天空中的橙色「球體」以兩到四個為一組發射出較小的紅色「球體」，其中以三個為普遍共識。據稱這種情況至少發生了五次。每次橙色球體都會出現，發射紅色球體，然後消失。橙色球體僅可見一到兩秒。紅色球體通常會以水平路徑遠離橙色「母」球體，但在少數情況下，一名證人稱其中一個紅色球體「以一定角度向上移動」，而另一名證人則稱有時紅色球體從較大的橙色球體發射後會「向下俯衝」。這些事件是由多個小組在為期兩天的時間內，從不同的位置和視角共同目擊的。由於事件的連續性質，目前尚不清楚是單個橙色「母」球體釋放了這些紅色球體群，還是有多個橙色球體在起作用。

“Large, Fiery Orb”

- Location: Western U.S.
- Time of Day: Dusk

Artist Rendering

- Two federal law enforcement special agents (USPER5 and USPER6) witness a glowing orange orb at a distance of “approximately 500-600 meters,”* where it was perched close to a rock pinnacle. Size was difficult to determine, but it appeared to be similar in size to a “small helicopter cockpit.”** Witnesses were unable to clearly see any structure other than the glowing orb, though USPER6 noted that the object “did almost appear it might have had a small spindle or something connecting it from underneath to the rock formation.” Witnesses stated that the object did not emit any noticeable sound. The object was described as being “similar to the Eye or [sic] Sauron from Lord of the Rings, except without the pupil, or maybe an orange Storm Electrify bowling ball.”
- USPER6 stated the object “seemed to be hovering with zero resistance or movement, or to be suspended...” The sighting lasted “about a minute.”

* Measurements later gathered by AARO assess the object to have been ~1050 meters away from the observers.

** Measurements later gathered by AARO assess the object to have been between 12-18 meters in diameter.

「巨大、火紅的球體」

- 地點：美國西部
- 時間：黃昏

藝術家模擬圖

- 兩名聯邦執法特別探員（USPER5 與 USPER6）目擊到一個發光的橘色球體，距離「約 500-600 公尺」*，當時它停靠在一座岩峰附近。大小難以確定，但看起來與「小型直升機駕駛艙」**差不多。目擊者除了發光的球體外，無法清楚看見任何結構，不過 USPER6 指出，該物體「看起來確實像是有個小主軸或某種東西從下方將其與岩層連接起來」。目擊者表示，該物體沒有發出任何明顯的聲音。該物體被描述為「類似於《魔戒》中的索倫之眼 [sic]，只是沒有瞳孔，或者像是一顆橘色的 Storm Electrify 保齡球」。
- USPER6 表示該物體「似乎在零阻力或無運動的狀態下盤旋，或是懸浮著……」。目擊過程持續了「約一分鐘」。

* AARO 隨後收集的測量數據評估該物體距離觀察者 ~1050 公尺。

** AARO 隨後收集的測量數據評估該物體的直徑在 12-18 公尺之間。

“Dark Kite”

- Location: Western U.S.
- Time of Day: Pre-dawn hours

Image 1: Recreation of drawing provided by USPER6 of object seen in night vision goggles.

- Two federal law enforcement special agents (USPER5 and USPER6) observed what is initially thought to be a car traveling along a road in a restricted zone. The “car” had two lights (one red and one white) that are about 2 to 3 feet off the ground. Agents pursued the “car” and as they got to within a few hundred feet of it, the object suddenly moved off the road over the desert without changing its orientation with respect to the observers, i.e., it appeared to move laterally, at an estimated speed of 15-20mph. The object didn’t change height and appeared to move with “zero resistance.” The object stopped about 100 meters off the side of the road and turned off its lights. USPER6 described the object as a “thin line,” from the back whereas the other agent (USPER5) stated that “it almost looked like an ill defined, dark kite shape that had some rounded width to the sides.”*
- USPER6 used night vision goggles (NVGs) to view the object once it had stopped off the road. The agent stated that they observed the object for “a split second in the NVGs before the light turned off” and that once the lights were off, a “very thin line” remained. The object was estimated to be about 4 feet wide and positioned horizontally to the ground (see **Image 1**). The object then began moving at about the speed of 15-20mph and appeared to “move up in height..., but [remain] a flat line.” The agent lost sight of the object after a few seconds.

* In later discussions with AARO, the object is described as being triangular.

「暗箏」（ Dark Kite）

- 地點：美國西部
- 時間：凌晨時分

圖 1：根據 USPER6 提供之夜視鏡中所見物體繪圖所製的重現圖。

- 兩名聯邦執法特別探員（USPER5 與 USPER6）觀察到最初被認為是在禁區道路上行駛的一輛汽車。該「汽車」有兩盞燈（一紅一白），距離地面約 2 到 3 英尺。探員們追蹤該「汽車」，當他們接近到幾百英尺以內時，該物體突然離開道路移向沙漠上方，且相對於觀察者的方位沒有改變，也就是說，它似乎是以估計 15-20 英里的時速橫向移動。該物體沒有改變高度，且移動時似乎「零阻力」。該物體在道路旁約 100 公尺處停下並熄滅了燈光。USPER6 將該物體描述為從背面看像一條「細線」，而另一名探員（USPER5）則表示「它看起來幾乎像一個輪廓模糊、深色的風箏形狀，側面帶有一些圓弧寬度」。^{*}
- USPER6 在該物體停在路邊後，使用夜視鏡 (NVG) 進行觀察。該探員表示，他們在夜視鏡中觀察到該物體「在燈光熄滅前的短暫瞬間」，而一旦燈光熄滅，現場仍留下一條「非常細的線」。據估計，該物體寬約 4 英尺，且與地面平行（見 **圖 1**）。隨後，該物體開始以約 15 至 20 英里的時速移動，並似乎「高度上升……但 [保持] 一條平直的線」。幾秒鐘後，探員便失去了該物體的蹤影。

^{*} 在隨後與 AARO 的討論中，該物體被描述為三角形。

“Transparent Kite”

- Location: Western U.S.
- Time of Day: Pre-dawn hours
- About 30 minutes after the “Dark Kite” sighting, federal law enforcement special agents (USPER5 and USPER6) returned to the same general area with another colleague (USPER7) in response to a report of another unauthorized object in the area. Within a few hundred meters of the “Dark Kite” sighting, two of the team members (USPER5 and USPER6) observed a kite-shaped object with a lighting pattern similar to the object seen previously. This object is about 6 meters off the ground, is canted at an angle from lower right to upper left (see **Image 2**), and appeared to be floating slowly with the wind. USPER5 was using NVGs when viewing the object and USPER6 used the bare eye. USPER7 did not see the object. USPER5 stated that in the night vision goggles, they could “vaguely see a bright star or two in the distance through the object, though somewhat more faint,” leading them to believe the object was somewhat transparent. After losing sight of the object, USPER5 tried using a spotlight to find it again. The witness noted that when shining the light around, “at one point my beam went from shining far into the distance to stopping about 50 yards away on nothing in particular, it just was not projecting into the distance and then it was.” When the witness pointed the light at the spot where the light had appeared to be blocked by something, this time the light was “projecting into the distance again.” The team was unable to reacquire sight of the object.

Note: Outline was not definitive, but location of lights stayed in exact formation.

Image 2: Recreation of drawing provided by USPER6 of object seen with the bare eye.

「透明風箏」

- 地點：美國西部
- 時間：黎明前時分
- 在「黑暗風箏」之後約 30 分鐘 sighting，聯邦執法部門的特別工作組（USPER5 與 USPER6）與另一名同事回到了同一大致區域（USPER7）針對該地區出現另一個不明物體的報告做出回應。在目擊「暗箏」（Dark Kite）的地點幾百公尺內，兩名團隊成員（USPER5 和 USPER6）觀察到一個風箏形狀的物體，其燈光模式與先前看到的物體相似。該物體距離地面約 6 公尺，呈右下往左上的傾斜角度（見 **圖 2**），且似乎隨風緩慢漂浮。USPER5 在觀察該物體時使用了夜視鏡（NVG），而 USPER6 則使用肉眼觀察。USPER7 沒有看到該物體。USPER5 表示，在夜視鏡中，他們可以「模糊地透過該物體看到遠處的一兩顆亮星，儘管稍微暗淡一些」，這讓他們相信該物體在某種程度上是透明的。在失去該物體的蹤影後，USPER5 嘗試使用探照燈再次尋找它。目擊者指出，當燈光四處照射時，「有那麼一刻，我的光束從照射到遠方，變成停在約 50 碼外沒有特定東西的地方，它就是無法投射到遠處，然後又可以了。」當目擊者將燈光指向光線似乎被某物阻擋的位置時，這次燈光「再次投射到了遠處」。團隊無法再次發現該物體。

註：輪廓並不清晰，但燈光的位置保持在確定的編隊中。

圖 2：根據 USPER6 提供的繪圖所重製之肉眼觀察物體。
